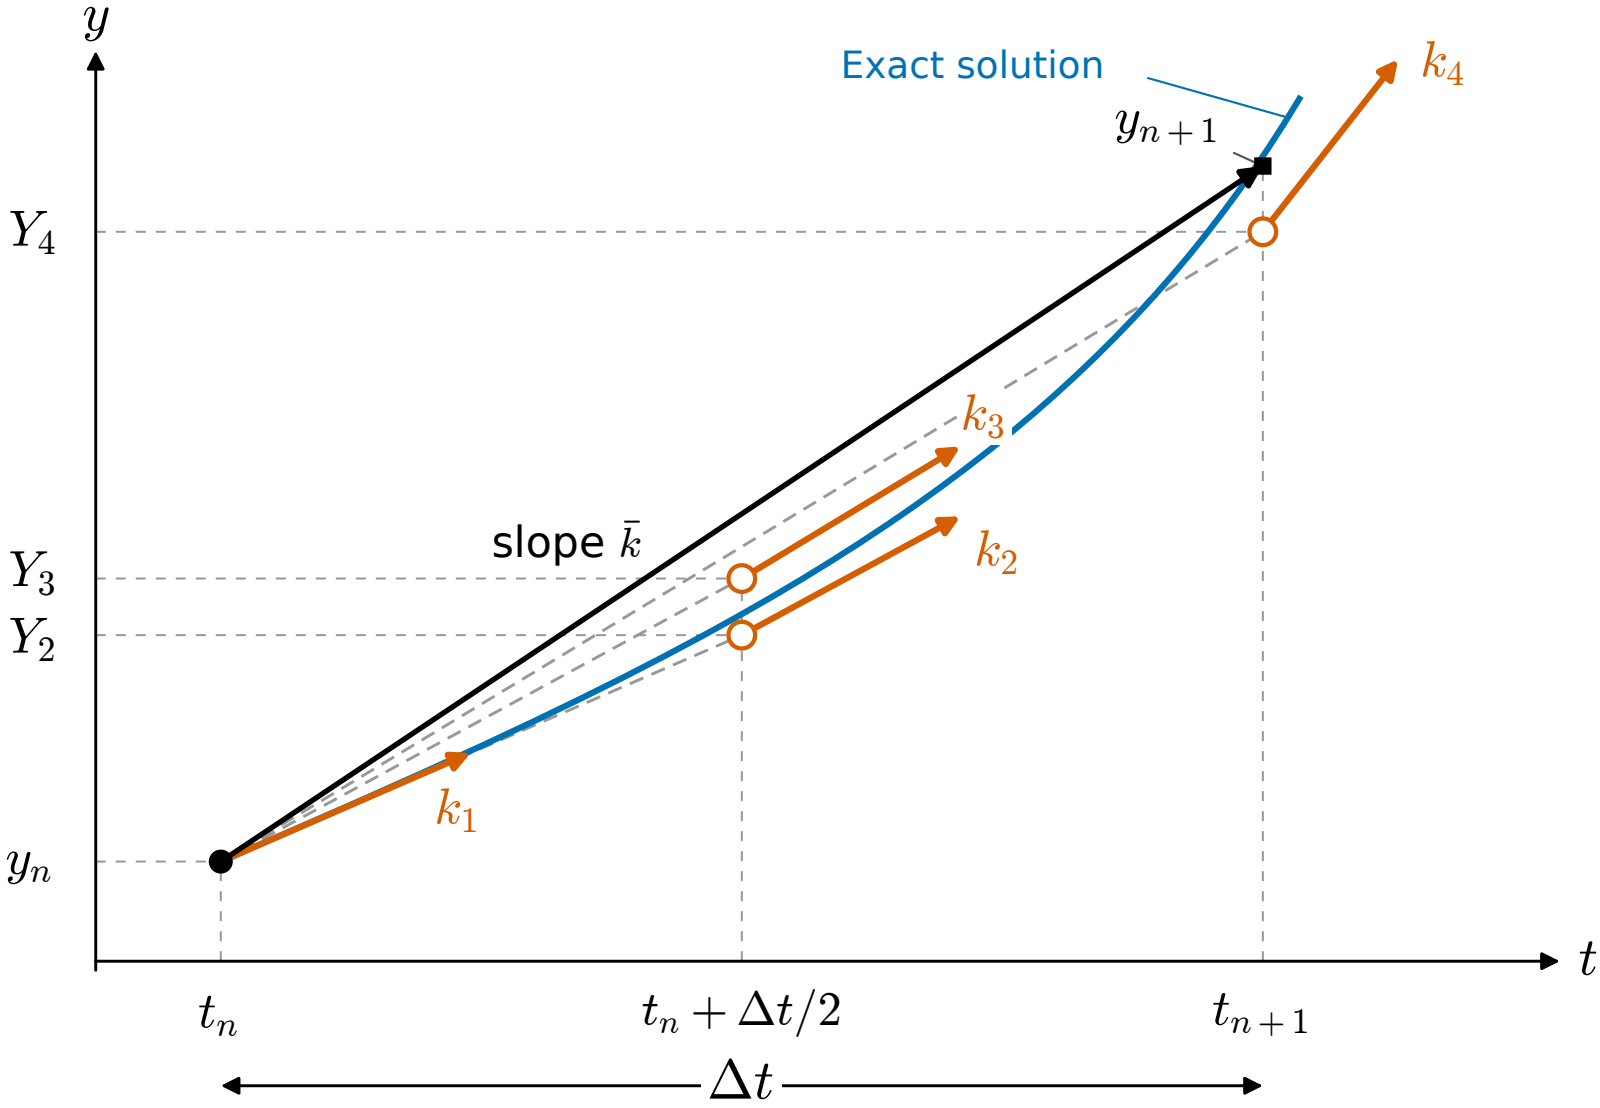
RK4: combine four slopes for one update

$y' = 1 + y^2, \quad t_n = 0, \quad y_n = 0, \quad \Delta t = 1$



$$\bar{k} = \frac{k_1 + 2k_2 + 2k_3 + k_4}{6}, \qquad y_{n+1} = y_n + \Delta t\, \bar{k}$$
